SURFACE-TO-AIR GUIDED MISSILE LAUNCHING SITES IN THE MOSCOW AREA⁽¹⁾ (S)

During a recent flight from Leningrad to Moscow via commercial air⁽²⁾, the ARMA, Moscow, photographed three (3) SAM launching sites north of Moscow. Two (2) of these sites are situated on the outer missile ring and the other is located on the inner ring. (see chart)

COMMENT: Detailed analysis of the photographs taken by ARMA denotes a slight error in the positions ascribed to the sites by ARMA, and indicates the coordinates of the sites to be more nearly as follows:

25X1D

Although the configuration of these three (3) sites conforms generally to the "herringbone" pattern typical of those reported previously, there are some apparent variations - probably due to terrain irregularities and/or orientation of the primary access road to the individual sites.
